

Access Tool for mobile Internet

Welcome to **MWconn**!

This document should have become a detailed users manual which provides you with information about all program functions and gives you hints solving technical problems.

I must admit, my English is not good enough to write this manual in English by myself. If you want to contribute some translation work, I would be glad for any help in translating the existing German users manual into English. Before you start translating, please contact me using the feedback mail address.

In case you cannot translate the German text but are a native English speaker and want to help by proofreading translated texts, you are also welcome to this little project!

Till this translation work has been done, there are still some sources, which will help you using **MWconn**:

First, the program itself can be switched between English and German. For doing this, press the language button at the lower left in CONFIG.exe. The Programm CONFIG.exe will be available after you have installed MWconn.exe.

Second, the configuration file MWconn.ini contains English parameter descriptions and additional information.

Third, some information you can find at English pages within **MWconn** website.

Finally, you can try a look into the German users manual "Anleitung". Even if you do not speak German, you could be able to retrieve some technical information from that document. Pictures and other illustrations will help you too.

Of course, you may write to our feedback mail address too! We will try to answer your questions.

And please feel free to report every translation error you might have discovered! Thank you!

License, Copyright

This version of **MWconn** is free for use. All, the program file MWconn.exe and both manual files MWconn_Anleitung.pdf and MWconn_Manual.pdf, may be copied and distributed freely by everyone. Conditions:

- None of these files may be changed.
- All three files must be distributed simultaneously. (Missing files can be downloaded from www.mwconn.com or ordered at email address mentioned above, subject: Download.)
- These files must not be offered for sale. Delivering in connection with other products or services requires the explicit permission by the program author.

Please note also: Executables which are wearing a commercial logo (not "Markus B. Weber") must not be copied without the author's permission.

Liability

Despite of great effort in programming the author cannot guarantee flawless program operation. Therefore liability is excluded as far as permitted by law.

Donation

If you're so happy with **MWconn** that you want to support further developement and download servers by a donation, we'd be glad to receive a few Euros by donation button at www.mwconn.com or to:
